Salaries Calculation

A muniment for calculating the value of salaries related to employees in which the value of the salary is calculated after deducting penalties, adding bonuses, and showing the net salary of the employee. This muniment also creates an accounting entry for salaries, bonuses, and penalties

Includes Salaries Calculation Window

Date : The date the salary was paid

Currency : Salary currency

Exchange : The transfer value if the payment is not in the main currency

Calculation Method : We choose the method of calculation that was created from the Calculation Methods Card

Employee : The name of the employee for whom the salary will be calculated

Branch: If applicable

Notes: Record notes, if any

And to calculate the employee's salary ..... After clicking New, we choose the date of payment and the currency and choose the method of calculation and let it be monthly, and then press the calculation of what is under the item of tools, so all employees whose contracts monthly appear in the calculation method, and after that we press the save and it is Create restrictions and fix the amount paid to the employee.
