

Automatic Manufacturing Model

Automated manufacturing model is used to create templates for materials for which we want to include automatic manufacturing in automatic manufacturing invoices directly when the invoices are stored.

To access the automatic manufacturing model from the **General - templates - Auto Manufacturing menu**

To create a new template we go to the **New** button

The following window will appear as in the picture

Raw Materials						
	Material	Unit	Qty	Price	Total	Notes
1	10104 - Motherboard	UNIT	1	750	750	
2	10106 - Processor Intel i7	UNIT	1	600	600	
3	10103 - ram 8Gb	UNIT	1	250	250	
4	10102 - hard disk 500Gb	UNIT	1	350	350	
5	10105 - Graphic card	UNIT	1	500	500	
6	10107 - Computer Cases	UNIT	1	175	175

1	10101 - desktop computer	UNIT	1	2,625	2,625	

1 1 1 2,625

OK Cancel

Note: If some fields do not appear to you, you can use the right mouse button and click on the table properties anywhere in the invoice table to show or hide the columns

In the **Material** field: we select the item

Warehouse field: Leave it blank if you want to use the invoice warehouse when selling

Notes field: form notes

From the raw materials table, add the raw materials needed to manufacture the material you chose above

Manufactured materials: The material you have selected will appear here above. To create a model for it, set the standard price for the material cost. Note: The program will automatically calculate the difference from the cost and record it in calculating the manufacturing variances when storing the sales invoice
