

Information Screen

To show or hide the information screen, we go to the **View - Information** menu

The information screen is used to show quick information about the data that we point to by the mouse or keyboard according to the tab to which screen belongs.

:As an example, we will explain the information screen by using the sales invoice

When searching for a customer's name and identifying it in the invoice, the information for this account like balance, descriptors information.... will appear on the information screen, according to the available authority for each user.

When moving to materials tab to add items to the invoice, detailed information about the material as its descriptors, available quantities in warehouses will appear on the information screen, according to the available authority for each user.
