

Prices

Through it, we define the prices used to be used when creating material cards on the program and .use them in invoices

To access the price card through stock - cards - prices

(Name: We write a name for the new price (for example: the offers price

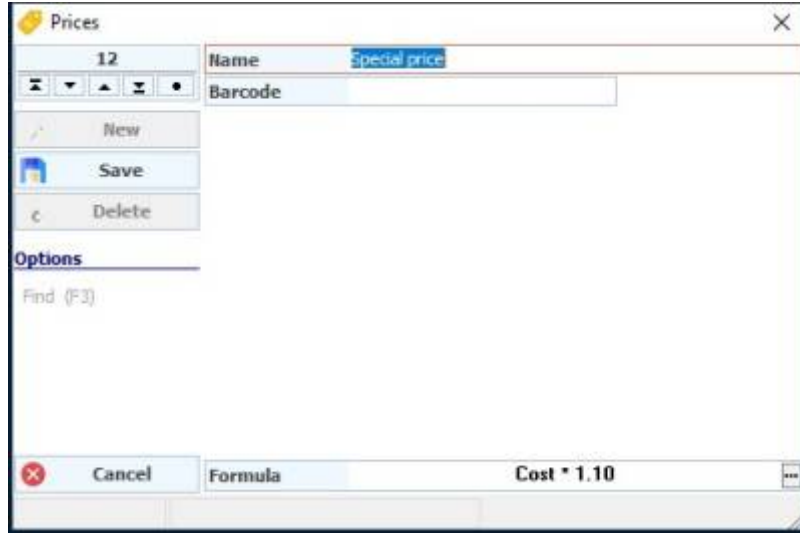

Barcode field: We put a price barcode if desired

Formula field: We put an equation, for example, to arrive at the offer price, which is equal to (cost (price + 10%

Variables	Value
Cost	Cost
BUYING	1.10
SELLING	
LAST BUYING	
LAST SELLING	

Cost * 1.10

We click the mouse on the cost price twice and then enter a value of 1.10 by clicking on the value button, then we put the indicator on the value after adding it and put the multiplication sign and press apply
