Invoices Profit Analysis

Report to analyze the profits of materials or accounts in invoices

There are several designs in this report

Design- Bills Profits - Clients

The profits of customers' bills can be reviewed by detailing each invoice with its cost of sales, profit value and profit percentage

Design-stagnant goods

Displaying the period of stagnation of materials in warehouses, is the time period from the last sale of the material to today's date in which no sale has occurred

Design-Material Profit Sort - Detailed

Through this design, it is possible to review the sales quantities and values of materials, the cost of sales, and the profit for each material

Design-Sort material profits - folders with cost

This design is similar to the previous design, but the difference is in the materials folders and the profits of these folders

Design-Profit Sorting - Periods

Profit analysis Periods of time (day - week - month ...). Periods can be specified from the report (request window (period
